PROFESSIONAL SUMMARY

B.Tech CSE (AIML) graduate with hands-on expertise in Network Traffic Analysis, OSINT, and SIEM monitoring, ranked in the Top 5% globally on TryHackMe with 102 labs completed. Proficient in analyzing Windows Event Logs and Sysmon telemetry, tracing IP addresses, and troubleshooting network anomalies using Splunk and Wireshark. Seeking to apply threat detection, log analysis, and incident triage skills in a SOC environment.

TECHNICAL SKILLS

Digital Forensics & SIEM: Splunk, FTK Imager, Autopsy, Sysmon, Windows Event Logs.

Network & Traffic Analysis: Wireshark, Nmap, Netcat (nc).

OSINT & Vulnerability Recon: Shodan, Exiftool, Gobuster, Feroxbuster, OSINT Framework.

Systems & Environments: Kali Linux, Windows OS Troubleshooting.

EXPERIENCE

QA Intern | ARC Document Solution India Pvt. Ltd. *Sep 2025 – Jan 2026*

- Identified data discrepancies and system errors across live production environments.
- Conducted precise quality assurance checks on digital pages, identifying visual anomalies and logging formatting errors for rapid technical resolution.

Founder & Technical Operations Head | Beeskilled (AICTE-Listed E-Learning Platform) Website

- Managed backend operations, server uptime, and user account provisioning for 10,000+ students.
- Implemented secure access policies and resolved login and technical issues.

PROJECTS

Universal Node Link Analysis (NLA) Engine (Financial OSINT) Link

- Developed a custom Python/Streamlit web application to map cryptocurrency laundering networks across TRON, EVM, BTC, and XRPL.
- Engineered dynamic, force-directed graphs (PyVis) to automatically identify Tier-2 consolidation wallets and exchange hot wallets.
- Integrated offline CSV-ingestion to trace Bank Account/UPI mule networks and implemented BSA Section 63 compliant SHA-256 evidence hashing.

CDR & IPDR Telemetry Analyzer (Telecom Forensics) Link

- Built a Python-based data processing tool to parse and analyze large-scale telecom logs (Call Detail Records & IPDR).
- Automated the extraction of high-frequency dialed numbers (B-party associations) and integrated map visualizations to plot cell-tower coordinates for suspect mobility tracking.

Encrypted Communication & Steganography Environment (ITD Stegano) Link

- Developed a client-side web application using HTML, CSS, JavaScript, and Python Flask.
- Implemented AES encryption and LSB steganography to securely embed hidden data within image files.

EDUCATION

B.Tech, Computer Science & Engineering (AIML) | Techno India University *Jun 2022 – Jul 2026*

CGPA: 7.12

ACHIEVEMENTS

- Ranked in the Top 5% globally on TryHackMe; completed 102 hands-on cybersecurity lab rooms.
- 1st Place, IoT Exposition - built a Smart Cooler with automated sensor monitoring.
